

Industrial & Large Commercial Services

PROVIDING OPPORTUNITIES FOR IMPROVING PLANT AND BUILDING OPERATIONS

TVA, in partnership with your local public power company, offers specialized assistance to industrial and large commercial concerns. Through its Industrial and Large Commercial Products and Services group, TVA can help you identify and implement cost-saving opportunities for your plant and building operations.

Industrial services

TVA's industrial marketing managers help develop energy solutions to productivity, environmental, product-quality, and plant-process problems.

These services are available to companies in the following industries:

- Machinery
- Metals production and fabrication
- Furniture
- Plastic products
- Textiles
- Transportation
- Food processing
- Municipal and decentralized water and wastewater systems
- Forest products
- Other industries depending on the customer's need

Large commercial services

TVA's large commercial market includes institutional and commercial customers with over 100 kilowatts of electric load, plus all commercial food service enterprises. The large commercial marketing managers work with schools, restaurants, and other facilities to improve processes and reduce costs.

Assistance is available for electric technology applications in the following areas:

- HVAC systems
- Domestic water heating
- Commercial food services
- Outdoor lighting services

Industrial and large commercial marketing managers can help with new, expansion, or renovation projects.
